

**GREETINGS FROM MARS!**

## **Curvilinear Ridges in Arabia Terra**

[uahirise.org/ESP\\_o16683\\_1855](http://uahirise.org/ESP_o16683_1855)

Acquisition date: 16 February 2010

Approximately 275 kilometers above the surface

These ridges are composed of material that is more resistant to wind erosion than the surrounding surface.
