## **Mysterious Color-Changing Dust Devil Track**

[uahirise.org/ESP\\_023327\\_2065](http://uahirise.org/ESP_023327_2065)

This area of Malea Planum is covered by bright dust and dark lines. These lines formed by swirling winds known as dust devils that move across the surface removing the dust cover and revealing the darker rock materials beneath.
