## Colorful Central Peak in an Unnamed Crater

[uahirise.org/ESP\\_023674\\_1590](http://uahirise.org/ESP_023674_1590)

Small impact craters retain their original bowl shape, but once a crater is large enough that the force of gravity on the slopes of the crater wall is greater than the strength of the target material, the wall collapses inward to form a central peak.
