## **Boulders on the Floor of Hellas Basin**

[uahirise.org/ESP\\_025688\\_1355](http://uahirise.org/ESP_025688_1355)

This image reveals bouldery patches on the floor of the giant Hellas impact basin.

The boulders are often crudely aligned. Maybe these boulders were deposited or sculpted by flowing ice (glaciers).
