## Summer is on Its Way

[uahirise.org/ESP\\_025916\\_2555](http://uahirise.org/ESP_025916_2555)

A few bright ice deposits remain sequestered in “cold traps” shadowed from the sun on the poleward-facing side of the dunes. Some bright patches of ice at the foot of the sunlit side of the dunes may be places where ice slumped to the foot of the dune creating a longer-lasting snow bank.
