

# Complex Gullies in a Crater

ESP\_058399\_1415

HIGH RESOLUTION IMAGING  
SCIENCE EXPERIMENT  
UAHIRISE.ORG

This image shows large gullies on both the pole- and equator-facing slopes. An important puzzle in Mars science is whether or not all of these gullies form in the same geologic eras and by the same processes. (NASA/JPL/University of Arizona. Less than 1 km across.)
